<div>telepizza.es</div>			
<p>Work in progress! Follow IntoDNS on Twitter</p>			
Category	Status	Test name	Information
Parent		Domain NS records	Nameserver records returned by the parent servers are: ns1.evolutio.es. ['212.49.128.65'] [TTL=86400] ns2.evolutio.es. ['212.66.160.2'] [TTL=86400] h.nic.es was kind enough to give us that information.
		TLD Parent Check	Good. h.nic.es, the parent server I interrogated, has information for your TLD. This is a good thing for domain extensions like "co.us" for example that are missing a direct check.
		Your nameservers are listed	Good. The parent server h.nic.es has your nameservers listed. This is a must if you want to be found. Know your DNS servers will first ask the parent nameservers.
		DNS Parent sent Glue	Good. The parent nameserver sent GLUE, meaning he sent your nameservers as well as the IPs of records are A records that are associated with NS records to provide "bootstrapping" information (RFC 1912 section 2.3)
		Nameservers A records	Good. Every nameserver listed has A records. This is a must if you want to be found.
Sub		NS records from your nameservers	NS records got from your nameservers listed at the parent NS are: ns1.evolutio.es ['212.49.128.65'] [TTL=1800] ns2.evolutio.es ['212.66.160.2'] [TTL=1800]

Ampliar el mapa

The map displays a large blue reservoir, the Cheney Reservoir, surrounded by a light green area labeled 'Cheney Wildlife Area'. Below the reservoir, a green area is labeled 'Cheney State Park'. The map includes a grid and a road labeled '556'. A hand icon indicates the map is interactive. In the bottom left corner, there is a small thumbnail of the current map view. The Google logo is centered at the bottom of the map area.
